HEATHROW HEAVY DUTY

Heathrow Heavy Duty Orthopaedic Chair for 24/7 and 'Big & Tall' applications

With its free-float mechanism and dual density seat foam, the Heathrow is a true HEAVY DUTY ORTHOPAEDIC OFFICE CHAIR.

The HEATHROW control room chair has been certified by SABS.

Control rooms and call centres operate on a 24/7 basis and require a seating solution that exceeds all design standards associated with office chairs used in a conventional office environment. The Heathrow was specifically designed by Karo to meet the highly demanding 24 hour, 7 days a week work environment. All the components used in this heavy duty chair have been designed to out-perform and out-last any conventional task chair.

What is an Orthopaedic Heavy Duty Chair?

The Free-Float mechanism allows the movement of the seat and backrest to be controlled separately.

Custom upholstery options

To match your home or office décor, the Heathrow Heavy Duty orthopaedic office chair can be upholstered in a wide choice of fabrics. Please note that all customised products have an associated manufacturing lead time.

Features	Heathrow Orthopaedic Chair (Multi-adjustable Armrests)	Heathrow Orthopaedic Chair (Height Adjustable Armrests)	Heathrow Orthopaedic Chair (Fixed Height Armrests)
Type of armrest	The Multi-Adjustable Armrest is height, width and depth adjustable, and provides the greatest ergonomic functionality.	The Height Adjustable Armrest . This armrest offers less ergonomic functionality than the multi-adjustable arm, but is steel reinforced.	The heavy duty Fixed Height Armrest armrest is not adjustable and is designed for extreme use.
