

CASINO SEATING

Casinos • Clubs • Pubs • Hotels

INTRODUCTION

“ We believe that everyone has the right to sit on a comfortable chair, and it is our purpose to provide this. ”

Karo was founded in May 1986 when the company began to manufacture specialist ergonomic seating. Over the years we have designed many innovative chairs for offices, call centres, control rooms and casinos.

At Karo we appreciate that casino seating is a significant investment and it is essential that it satisfies the requirements of both the venue operator and the patrons. We understand that the venue operator demands an aesthetically pleasing product, together with rugged durability and low maintenance cost.

Constant feedback from our customers has empowered us to identify the most common problems clubs and casinos experience with their gaming chairs, and this information has allowed us to refine our products and offer a smarter seating solution.

- Our unique weld-free design for pedestal stools eliminates the potentially disastrous failures commonly associated with chairs that have welded joints.
- Glue-free upholstery permits cost-effective re-upholstery to prolong the life of your investment.
- Our exclusive taper-lock design allows our pedestal chairs to be easily converted from one height to another at a fraction of the cost of a new chair.
- To improve comfort and longevity, our seats are all manufactured in-house using automotive-grade PU moulded foam.
- Quick-Release seats enable you to exchange damaged or soiled seat cushions within minutes, right on the gaming floor.
- We are committed to environmental sustainability and we actively develop products, processes and systems to reduce our impact on the environment.

Our Quality Management System, experience, and 7-year warranty gives you the confidence that our casino chairs will provide many years of cost-effective service.
